## ABOUT US:

**THE SOUTH INDIA GARMENTS** is a unit of PK Group of companies which has many establishments in all types of business at Tirupur.

In 1938, Thiru. P.Karuppanna Gounder, a famous businessman of Tirupur, started this group of companies with a Grocery shop and gradually this company developed by him added wings to a Cinema Theatre, Building construction, Oil Mill, Rice Mill, Dye-House, Sewing Thread & Embroidery Thread Unit and now a Garment manufacturing unit.

Our Founder, Thiru. P.Karuppanna Gounder passed away in the year of 1998 and this Garment Unit was started to honour our Founder.

In this "Town of Export Excellence", **THE SOUTH INDIA GARMENTS** is weaving a special place for itself in value added garments for Men, Women & Children.

#### **OBJECTIVES:**

To achieve leadership in the garment exporting industry by producing quality garments to consumer's expectation, while also discharging our responsibility as a business house in keeping in perspective the social, economic, culture and environmental concerns of the nation.

To achieve customer satisfaction through enhancement of product standards and timely delivery.

#### **QUALITY POLICY**

At The South India Garments, quality is driving force behind each of our operations. We believe a good product speaks more about the manufacturer than anything else and hence we take all possible efforts to give our customers the best.

Every process is lined with meticulous quality control and supervised with precision, right from procurement upto delivery.

## INFRASTRUCTURE:

Working for perfection and quality starts right from the raw material stage and continues to the finished product. The Entire production is managed in-house to ensure that all specifications and quality requirements are met promptly and accurately.

## GASSING:

We are equipped with the yarn gassing machine to remove the protruding fibres to have the better quality on the fabrics in aspect of improved reflection & smoother surface.

## MERCERISING:

For manufacturing of the premium end mercerised products Yarn Mercerizing machine is installed to make the cotton yarn with a better surface reflection and also improved strength.

## DYEING:

Oeko - Tex certified Dye house is equipped with Fongs Yarn dyeing machines imported from Taiwan with the total production capacity of 3 tonnes per day. Laboratory with the latest dispensing machine helps to achieve the quality with the colour matching and consistency. We are the first in India to install the Nano Filtration technology for the reuse of the brine solution again for the dyeing process. As we maintain the ZERO discharge of effluents we are proud to say that We care for our Mother Earth.

## KNITTING:

The modern circular knitting machines imported from Germany are being engaged for the production of different and best quality knitted fabric.

## COMPACTING:

All the Fabrics are pre shrunk so that the garments crafted by us stay in shape. For this process of fabric shrinkage controlling, we are equipped with the latest compacting machine from Tubetex USA. This process is done to ensure the fabrics are compacted to perfection before garmenting.

## PRINTING:

Printing is one of our chief strength. Equipped with MHM printing machines, we produce innovative and trendy designs in pigment, reactive and discharge up to 10 colors with engineered repeat options.

The latest, fully automated printing machines are used which results in better print quality. Further, the system may be easily expanded & equipped for specific order requirements.

## SEWING & EMBROIDERY THREADS:

We have established our own brands in Sewing thread & Embroidery thread under the name "OPAL", "MARVEL" & "PICASSO" and our products as OEKO Tex certified.

## GARMENTING:

The Garments are manufactured with the latest computerized machineries like Juki, Pegasus imported from Japan and our manufacturing capacity is 5 Million pieces per annum. Quality control team is engaged with quest for perfection and the quality checks are implemented right from raw material to the final garment packing. With an efficient and impressive work force along with technical professionals we are always able to make the right garments in right time for all our customers.

## WIND POWER:

As a Socially committed organization we are utilizing the renewable energy source and an ecological technology to generate electricity from the wind power and we use the generated power for our captive use.

## EXPORT:

Understanding the needs of clients, Quality and Timely delivery makes ours a success story in various countries. Serving to the latest trends with up gradation in technology, The South India Garments caters to a variety of clientele in USA & Europe.
